

Three things to know about Electric Choice

1. The Electric Choice program continues.

Pennsylvania planned the Electric Choice program to let you choose the company that generates your electricity. Right now there might not be any offers from other electric generation suppliers giving you a choice. That may change in the future. We send you this information about Electric Choice twice a year so the information is handy when there are offers.

No matter what electric generation supplier you choose, PPL Electric Utilities will deliver safe, reliable electric service to your home or business.

2. Your Price to Compare is your key to shopping.

You can use the Price to Compare to evaluate prices offered by competitive electric generation suppliers. If a supplier's price is lower than your Price to Compare, you can save money by choosing that supplier. We are providing you this information because the Price to Compare does not appear on your electric bill.

The Price to Compare includes generation and transmission charges only. Other charges that appear on your bill, such as distribution charges, are still paid to PPL Electric Utilities.

3. Information is available to help you compare suppliers when there are offers.

- Visit the Pennsylvania Public Utility Commission Web site, www.puc.state.pa.us/utilitychoice. Click on the Electric Choice icon and select "List of Suppliers" to see all licensed suppliers.
- Visit the Pennsylvania Office of Consumer Advocate Web site, www.oca.state.pa.us (see Residential Electric Shopping Guide), or call 1-800-684-6560 for a list of current suppliers in your area and their prices.
- Visit the PPL Electric Utilities Web site, www3.pplweb.com/choice, or call toll-free:
 - 1-888-668-4775 for residential customers,
 - 1-888-220-9991 for nonresidential customers.

Charts on the back page show the average Price to Compare for customers in various rate groups. Your rate group can be found on your monthly bill. Your Price to Compare will vary monthly depending on your electricity use, which you can find on the summary page of your electric bill, next to the electric usage chart.

Become an informed electricity consumer. Use this information to learn more about Electric Choice.

2008 and 2009 average Price to Compare*
(in cents per kilowatt-hour)

Residential rate	2008	2009**
RS	5.85	5.96
Nonresidential rate	2008	2009**
GSI, G1T	6.93	7.07
G1V	5.59	5.70
G1C	0.51	0.51
GH1, H1T, H1P, H1Q	5.43	5.54
GH2, H2R	5.32	5.43
GS3, G3T	6.17	6.30
G3V	5.49	5.60
G3C	2.34	2.38
LP4, L4T	5.24	5.35
L4C	2.28	2.32
LP5, L5T	5.03	5.14
L5S	11.99	12.25
LP6, L6T	4.68	4.78

* These figures represent charges for generation, transmission and various state taxes. Your actual Price to Compare will vary monthly depending on your electricity use.

** These figures represent scheduled generation charges for 2009. Changes in transmission charges and state tax rates also may affect the 2009 Price to Compare.

Note to customers on closed residential rate schedules

PPL Electric Utilities has other residential rate schedules that were closed several years ago but remain in effect for homes that were on these rates at the time they were closed. If you are on one of these rates, your average Price to Compare is shown below.

RTS: 2008 – 5.22 cents, 2009 – 5.32 cents.

RTD: 2008 – 5.34 cents, 2009 – 5.44 cents.

RW1: 2008 – 4.93 cents, 2009 – 5.02 cents.

Note to nonresidential customers

PPL Electric Utilities offers regulated services, including Provider of Last Resort (POLR) service, under rate schedules approved by the PUC. We have a one-year minimum term for services to nonresidential customers. A nonresidential customer who returns to PPL Electric Utilities for electricity supply after being served by an alternative supplier must remain with POLR service for a period of one year.

PPL Electric Utilities offers a Generation Rate Adjustment that gives nonresidential customers the option of paying market-based rates for short-term POLR service so they can shop for an alternative supplier without completing the one-year stay. For information about this option, call 1-888-220-9991.

Note to nonresidential customers with EDI/IDI credits

EDI/IDI credits do not apply to electricity purchased from alternative suppliers. If you shop, you will retain only 15 percent to 17 percent of your current credit, depending on your rate schedule and electricity use. If your account receives EDI or IDI credits, do not use the Price to Compare shown in the table. For help calculating a Price to Compare, call 1-888-220-9991.
