

## Alternative Energy Credits (“AEC”) RFP

### AEC Delivery Schedule

#### 12-month AEC Products in the April 2012 Solicitation

Target Quantities for the April 2012 solicitation are shown in the table below:

Target Quantities (MWh)			
Delivery Period Beginning June 1, 2012	Tier I	Photo-Voltaic	Tier II
12-months	15,904	206	24,971
Note: Total of Tier I and Photo-Voltaic equals total Tier I obligation.			

Through the Alternative Energy Credits (“AEC”) RFP, PPL Electric purchases AECs necessary to meet the AEPS Obligation associated with its purchases of Block Energy Supply under its Default Service Procurement Plan (“DSPP”). In the AEC RFP, AECs will be procured through multiple solicitations that mirror the purchases of Block Energy Supply under the DSPP.

In the April 2012 solicitation, PPL Electric solicited bids to supply Tier I (PV), Tier I (non-PV) and Tier II AECs for the period June 1, 2012 through May 31, 2013. These AECs must comply with the Pennsylvania Alternative Energy Portfolio Standards for retail sales of energy during the supply period covered by the Block Energy Supply of June 1, 2012 through May 31, 2013.

The AEPS Act permits EDCs and EGSs to bank AECs created in one reporting year for use in either or both of the two subsequent reporting periods. See 73 P.S. § 1648.3(e)(6). As such, in the April 2012 solicitation, AECs procured must be based on renewable energy generated between June 1, 2010 through May 31, 2013. During the delivery period, the number of AECs must be provided in equal monthly deliveries.

#### **Delivery to GATS and Payment**

AECs must be transferred to PPL Electric’s GATS account within 40 calendar days of the last day of the month (and 50 calendar days of the last month of the delivery period). PPL Electric will make payments in accordance with the delivery schedule for AEC transactions pursuant to this April 2012 solicitation of the AEC RFP. Please consult sections 2.3(c), 2.3(d), 5.1 and 5.2 of the AEC SMA for more information.
