

# RESIDENTIAL ENERGY DIAGNOSTIC AUDIT PROGRAM

Brought to you by

**The Residential Energy Diagnostic Audit Program** promotes the use of a certified Building Analyst to perform an energy assessment of your home. An assessment is a top-to-bottom, inside-and-outside inspection that includes diagnostic testing with specialized equipment to measure air leakage, moisture conditions and heating system performance, if applicable. Your certified Building Analyst will make expert recommendations that can save energy and make your home more comfortable. There are assessment rebates available to partially reimburse PPL Electric Utilities (PPL EU) customers who own and live in their single-family homes. Customers with primary electric heat can qualify for \$250.00 and those with other heating types can qualify for \$100.00. Rebates are limited to the first 5,000 PPL EU customers who act on this offer.

Please find below companies that employ Building Analysts certified by the Building Performance Institute (BPI), a national resource for building science technology that sets standards for assessing and improving the energy performance of homes. It is recommended that you contact two or more of these companies to compare assessment services and pricing. You must use one of these companies to qualify for the rebates described above and the certified Building Analyst is required to sign their section of your Rebate Application form for you to qualify for your rebate. PPL EU, through its Program Administrator Lockheed Martin, inspects a sample of assessments to ensure quality, consistency and Program compliance (including adherence to BPI health and safety standards).

## Companies that Employ Building Analysts Certified by the Building Performance Institute

**PLEASE NOTE:** This list will be expanded as more analysts become BPI-certified. Please go to PPL EU's website [pplelectric.com](http://pplelectric.com), click on the epower logo in the lower right corner and then on "energy audit rebate program" for the most current list.
