

PPL Electric Utilities Offers a Free Energy Benchmarking Service

**How energy efficient are your schools? Would you like to find out?
Well, now you can...for FREE!**

PPL Electric Utilities is proud to offer FREE Energy Benchmarking to its school customers, through TRC Energy Services, to analyze and rank the energy performance of K-12 public schools within PPL Electric Utilities service territory. Setting an energy benchmark is the first step to becoming more energy efficient. The knowledge gained from this analysis will help identify those facilities that have high potential savings opportunities.

Participation is completely voluntary, confidential, and free! All you have to do is:

- Fill out the attached Building Data Request Form for each building you would like to benchmark, and,
- Submit at least 12 consecutive months of heating fuel bills (natural gas, fuel oil, or propane) for each building, preferably 24 months. Be sure to include the monthly usage as well as the delivery and supply costs if they are separate. You can e-mail the data to us in a spread sheet or as a PDF file, or you can mail us paper copies.
- You do not need to submit your electric bill data. PPL Electric Utilities will automatically submit your customer bill electric use data for each school you complete a Building Data Request form.

Fax to: 1-866-334-5533

E-mail to: PPLSchoolsBenchmarking@TRCSolutions.com

Mail to: TRC Energy Services, 10 Maxwell Dr., Suite 200, Clifton Park, NY 12065

For More Information Call: 1-866-334-0775

Your school's energy information will be analyzed using several models and the results will be compared to other buildings in your district and to other K-12 public schools in PPL Electric Utilities service territory. Each school will receive a report that includes a graphical representation of the building's performance as well as a detailed explanation of each of the indicators used to rank the building. The building's "carbon footprint" is included. The report will also contain recommendations as to how you might proceed to improve the energy efficiency of the building.

If you believe you are already energy efficient, you might belong to the top 25% of schools *nationwide* that can qualify for and receive the ENERGY STAR[®] Label, certified by the U.S. Environmental Protection Agency, to display in your school. Additionally, school districts demonstrating outstanding district-wide improvement in energy efficiency can qualify for the ENERGY STAR[®] Leader award.

Questions, or more information about this free energy benchmarking service, please call toll-free at 1-866-334-0775 or e-mail us at PPLSchoolsBenchmarking@TRCSolutions.com

Energy Benchmarking Building Data Form

Please submit one complete form for each school building.

General Info: School District; _____ School Name: _____

School Address _____ City _____ State PA Zip Code _____

Point of contact: Name/Title _____

Address _____

Phone _____ E-mail _____

Fax _____ cell Phone _____

Building Info Year Built _____ Number of students _____

Size of building (sq. ft.) _____ Number of FTE teachers/administrators _____
(Do **not** include unheated attics or basements)

No. of floors _____

Number modular classrooms onsite _____ Size of modular classrooms (total sq. ft.) _____

School type: High School Middle/Junior High Elementary Other:

How is building heated? _____ No. of personal computers _____

How is building cooled? _____ Percent of building cooled _____

Does the building have cooking facilities? Yes No

Number of walk-in refrigerator /freezer units _____

Does the building have a pool? No Yes, the size of the pool is:

Olympic 50m x 25m Olympic 50m x 25y Recreational 20y x 15y Short Course 25y x 20y

No. of months per year pool is in use _____ Location of pool: Indoor Outdoor

No. hours of occupancy per week _____ No. months operated per year _____
(Times when the majority of the building is being used)

Is building operated on the weekends? Yes No
