

YOUR INVITATION TO ATTEND THE NEXT IEEE LEHIGH VALLEY SECTION POWER & ENERGY SOCIETY MEETING

TOPIC: Utility DC Batteries and Charging”

DATE: Tuesday, September 25, 2018

LOCATION: HindlePower (Easton, PA)

TIME: Meeting starts with networking at 3:30 PM
The presentation will start at 4:00 PM and end at 7:00 PM
A Product Demo will follow the presentations

RESERVATIONS ARE REQUIRED BY SEPTEMBER 21st 11:59 PM USING THE FOLLOWING LINK: <https://events.vtools.ieee.org/m/176715>

Three PDH's are available for IEEE members only. You must register in the "Special Requests" Field and sign in at the meeting to receive a PDH certificate.

Presentation Topics: The presentation topics will include NERC Compliance in relation to DC systems, battery history, battery sizing, battery charger sizing, and other relevant topics. A product demo will follow the presentations.

Biography:

Art Salander has spent 40+ years in the stationary battery/dc power industry. Among his accomplishments, he has spoken for many industry groups and published numerous articles and papers on industry relevant topics. Further, he generally is requested to provide presentations on topics ranging from battery history, sizing batteries and battery chargers, specifying assistance and much more...

James Buniak has worked with utility-based DC systems for the extent of his career. His experience ranges from system production to system design to application engineering. He has had the opportunity to see the business from many angles working with several utilities.
